Re: WBWL(AM), Jacksonville, Florida
Facility Identification Number: 53588
Radio Disney Group, LLC.
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed October 19, 2007, on behalf of Radio Disney Group, LLC ("RDG"). RDG requests modification and extension of the special temporary authority ("STA") granted on April 19, 2007, to operate Station WBWL during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.¹ In support of the request, RDG states that the station's ground system was damaged by vandals and that negotiations are underway with the property owner to implement improved security measures to prevent reoccurrence. RDG states that, once actual repairs commence, it will be necessary to operate at times during nighttime hours in nondirectional mode with power reduced to 25% of the licensed value.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ WBWL is licensed for operation on 600 kHz with 5 kilowatts daytime and 5 kilowatts nighttime, employing a directional antenna during nighttime hours only (DA-N-U).

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

Accordingly, the request for modification and extension of STA IS HEREBY GRANTED. Station WBWL may operate during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Operation during nighttime hours with a nondirectional antenna and reduced power not to exceed 1.25 kilowatts also is authorized, only as necessary to facilitate the repair work. It will be necessary to further reduce power or cease operation if complaints of interference are received. RDG must notify the Commission when licensed operation is restored.² RDG must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **October 28, 2008**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
